

Industrial Trades

ASD-N ICE Centre

PROGRAM OVERVIEW

The ASDN ICE Centre is a career education centre that offers students an opportunity to explore possible career paths while developing hands on skills. All courses offered at the ICE Centre are in collaboration with NBCC, CCNB and industry partners. All students will have the opportunity to meet with an NBCC or CCNB Recruitment Advisor while also exploring other post-secondary options with their respective teacher. Students will earn credits from their respective High School while also gaining real life experience and meeting potential employers.

Our objective is to provide students with the opportunity to explore a possible career path and develop a plan for their future.

COURSE DESCRIPTION

Intro to Industrial Trades is a hands-on experiential learning course where students will explore a variety of career opportunities in the Industrial field.

Throughout this course students will develop an understanding and appreciation for the skilled trades involved in industrial settings. The course will explore the industrial world as it relates to our daily lives and potential careers. Students will compare skilled trades in various settings while also planning for their future career.

Students enrolled in this course will spend 50% of their time at the AV Cell Mill exploring the skilled trades involved in the operation of the mill. The main careers covered in this course will be:

- Power Engineer
- Industrial Welder
- Industrial Electrician
- Industrial Mechanic
- Instrumentation Technician
